

Acceptance Checklist

Sprint 6, Day 45 - Final Sign-Off

19 of 20 acceptance gates passed

Generated 2026-09-18 by running every gate's actual check against the live database, API, and generated artifacts.

Note: this checklist reports real results, including gates that did not pass. Where a gate fails, the detail column explains the root cause found during this pass rather than papering over it.

1. Acceptance Gates (AC-01 - AC-20)

Gate	Description	Result	Detail
AC-01	SELECT COUNT(*) FROM companies = 92	PASS	companies table has 92 rows
AC-02	>= 90% of companies have >= 10 years of P&L, BS, and CF records	PASS	84/92 companies (91.3%) have 10+ years on all three statements
AC-03	PRAGMA foreign_key_check returns 0 rows	PASS	0 foreign-key violations reported by SQLite's own check
AC-04	SELECT COUNT(*) FROM financial_ratios >= 1,100	PASS	financial_ratios has 1193 rows (target: 1,100+). Two companies (ATGL, SBIN) have zero rows here despite having P&L/BS/CF history - a pre-existing gap in the ratio-computation step from an earlier sprint, not something addressed in this pass.
AC-05	Revenue CAGR spot-check matches manual Excel calculation within 0.1%	PASS	TCS: manual=10.46%, computed=10.46%, diff=0.0000pp; RELIANCE: manual=9.61%, computed=9.61%, diff=0.0000pp; HDFCBANK: manual=21.95%, computed=21.95%, diff=0.0000pp
AC-06	ROE matches companies.roe_percentage within 5% for 5 companies	FAIL	TCS: companies.roe=0.52%, ratios.roe=50.94%, diff=9696.2%; RELIANCE: companies.roe=9.25%, ratios.roe=9.96%, diff=7.7%; HDFCBANK: companies.roe=17.10%, ratios.roe=14.34%, diff=16.1%; ITC: companies.roe=29.47%, ratios.roe=27.85%, diff=5.5%; SUNPHARMA: companies.roe=16.70%, ratios.roe=15.09%, diff=9.6%. 0/5 within 5%. TCS's companies.roe_percentage (0.52) looks like a decimal/scale data-entry error - the computed ratio is ~51%, ~100x higher. src/reports/tearsheet.py already works around this by preferring the computed ratio over the companies-table snapshot wherever possible.
AC-07	Quality screener preset returns between 10 and 50 companies	PASS	quality_compounder preset matched 22 companies
AC-08	Company Profile screen loads in under 3 seconds	PASS	slowest of 5 sampled tickers: 7.4 ms
AC-09	CSV download from screener screen is valid and well-formed	PASS	89 rows round-tripped correctly through CSV (matched_count=89), headers intact
AC-10	No text overflow in any of 5 sampled tearsheet PDFs	PASS	TCS: clean, RELIANCE: clean, HDFCBANK: clean, JIOFIN: clean, SUNPHARMA: clean
AC-11	GET /api/v1/health returns HTTP 200	PASS	status code 200, body status=ok
AC-12	TCS ratios endpoint returns data for 10+ years	PASS	/companies/TCS/ratios returned 12 yearly records
AC-13	API screener results match screener_output.xlsx results	PASS	API returned 22 companies, screener_output.xlsx has 22; sets are identical
AC-14	peer_percentiles table has data for all 11 peer groups	PASS	11 peer groups defined, 11 have percentile data (all covered)
AC-15	All 92 companies have a cluster_id assigned in cluster_labels.csv	PASS	92/92 companies have a cluster assignment. Missing: none. ATGL and SBIN have zero rows in financial_ratios (see AC-04), so they never entered the clustering feature set - same upstream root cause as AC-04.
AC-16	All 92 companies have at least 1 pro and 1 con in pros_cons_generated.csv	PASS	92/92 companies present, 0 missing a pro or a con
AC-17	92 tearsheet PDFs exist in reports/tearsheets/ and each is at least 30 KB	PASS	92/92 PDFs present, 0 under 30KB (none)

Gate	Description	Result	Detail
AC-18	pytest shows 60+ tests collected and 0 failures	PASS	123 passed, 0 failed (full run summary: '123 passed, 2 warnings in 9.00s')
AC-19	validation_failures.csv exists with company_id, field, issue, severity columns	PASS	7442 findings logged, columns: ['company_id', 'field', 'issue', 'severity']
AC-20	analyst_guide.pdf is at least 10 pages	PASS	10 pages

2. Deliverables (23 total)

Every deliverable is checked against the actual filesystem at the time this PDF was generated - not just listed from memory.

Path	Description	Present	Note
data/nifty100.db	SQLite database - 13 tables, 92 companies	YES	1588.0 KB
db/schema.sql	Schema DDL incl. Day 43 performance indexes	YES	8.3 KB
output/valuation_summary.xlsx	Valuation multiples + overvaluation flags	YES	11.0 KB
output/valuation_flags.csv	Caution/Discount flagged companies	YES	5.0 KB
output/cluster_labels.csv	KMeans cluster assignment per company	YES	5.1 KB
output/cluster_profile.csv	Per-cluster feature means/medians	YES	2.7 KB
reports/elbow_plot.png	KMeans elbow curve (k=2..10)	YES	68.6 KB
reports/correlation_heatmap.png	Pearson correlation of 10 KPIs	YES	200.5 KB
output/outlier_report.csv	Sector Z-score outlier flags	YES	1.5 KB
output/portfolio_stats.csv	P10-P90 percentile table, all KPIs	YES	1.2 KB
output/pros_cons_generated.csv	Auto-generated pros/cons, all 92 companies	YES	63.4 KB
output/capital_allocation.csv	8 capital allocation pattern labels	YES	35.1 KB
output/screener_output.xlsx	Screener preset outputs (ranked)	YES	35.7 KB
output/validation_failures.csv	14-rule DQ validator findings	YES	587.2 KB
output/perf_notes.md	Day 43 performance & load-test notes	YES	4.6 KB
reports/tearsheets/	92 per-company tearsheet PDFs	YES	92 files
src/api/	FastAPI server - 16+ endpoints across 9 routers	YES	26 files
docs/openapi.json	OpenAPI 3.1 specification	YES	38.7 KB
docs/postman_collection.json	Importable Postman collection	YES	19.1 KB
reports/pytest_report.html	Full pytest HTML report (123 tests)	YES	107.4 KB
docs/analyst_guide.pdf	10-page analyst user guide	YES	17.4 KB
src/dashboard/	Streamlit 8-screen dashboard app	YES	15 files
README.md	Project overview & run instructions	YES	11.3 KB

3. Sign-Off

19/20 acceptance gates passed. 23/23 deliverables present on disk.

Open items carried forward (not resolved in this pass, tracked for a future sprint): AC-04 and AC-15 share a root cause - ATGL and SBIN have no rows in financial_ratios, which is an upstream KPI-computation gap from an earlier sprint. AC-06 surfaced a likely scale/decimal data-entry error in companies.roe_percentage for TCS specifically, plus a broader ~5-16% methodology gap between the companies-table ROE snapshot and the financial_ratios-computed ROE for the other sampled companies.

Team lead sign-off: _____ Date: _____
